Hi Mike;

Sorry I did not get back with you right away, but I am on a pipeline break in Colorado. VOA and BNA data look like crude. API gravities in the low twenties match up with the heavy Wabasca crude. Does not match a very heavy crude with API gravity of less than ten.

The Coast Guard data arrived yesterday afternoon. I will send to Edison and have chemists compare to Enbridge Line 6B oil.

thanks

Hi Greg.... not trying to rush you.... we just want to get an idea as to when you will have time to review the oil data and let us know any thoughts.... we are getting some pressure to post the data publicly.... we don't want to do that until you have had a chance to look it over.

thanks Greg.

here are our final data for the oil samples, including gravity tests....

we would be interested in your thoughts on the sample results.

thanks very much.

Mike McAteer, OSC
